## BS5064 REAR BRAKE SHOE FOR FORD ESCAPE & MAZDA TRIBUTE 2001 ONWARDS

Bendix have reviewed and updated the catalogue brake shoe listings for the Series 1 Ford Escape and Mazda Tribute.

Originally the rear brake shoes for the Series 1 Ford Escape and Mazda Tribute were identified as BS1791, the same brake shoe used on a 1990's Ford Telstar / Mazda 626. Further examination revealed the brake shoe dimensions were the same; however the pin used to locate the park brake lever and adjuster was different. As a result Bendix introduced part number BS5064 with a new pin configuration.

The 2013/14 Bendix Brake Pad & Shoe Data Book has incorrectly listed part number BS1791 for the Ford Escape and Mazda Tribute, the correct listing is BS5064.

### Bendix recommends the following changes are made to your 2013/14 Data Book:

- Page 51, line 1, Ford Escape Rear – change BS1791 to BS5064.
- Page 109, line 26, Mazda Tribute Rear – change BS1791 to BS5064.

The Bendix Online Catalogue contains the latest information of vehicle fitments.

### Applications:

Manufacturer	Model	Year	Variant	Front	Rear	Park
Ford	Escape	1997-2006	3.0 AWD Wagon	DB1426	BS5064	
Mazda	Tribute	2001 On	2.0, 3.0 Wagon	DB1426	BS5064	

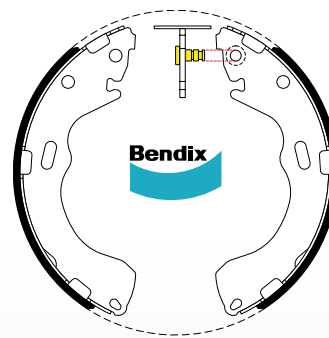

### What happens to BS1791?

Brake Shoes BS1791 will continue to be available. While most Ford Telstar / Mazda 626 vehicles in Australia and New Zealand had 4-Wheel Disc brakes by 1991 there are still a few with rear drum brakes. Up to 1991 they had 200mm (8 inch) drums using BS1409, after 1991 they have 225mm (9 inch) drums using BS1791.
