

RYCO FILTERS

FITTING INSTRUCTIONS FOR RYCO CABIN FILTER RCA175P

FORD TAURUS (Filter is located at engine bay)

1. The cabin air filter is located in the engine bay behind the passenger side cowl.
2. Open the bonnet and remove the passenger side cowl trim by removing the clips holding the trim edge against the cowl. Lift the trim slightly until the inner metal clips are visible and use a screw driver to help pushing them out.
3. Flex up the water shield and reach for the old filter.
4. Slide the old filter out carefully to avoid accumulated debris spreading around. Clean area and insert the new filter making sure it is in the right air flow direction ensuring the filter is seated properly in the housing. Refit all components in reverse order.
